Introduction

Food is one of the most important thing in our everyday life, it wakes us up, keeps us going, and brings us back to each other. A bowl of something warm can fix a mood, start a memory, or turn an ordinary night into a small celebration, especially for students, deadline-dazed or far from home.

- 
- 43% percent of college students move out of their hometown.
 - 1.1 million international students enrolled in a U.S. college.
 - 39% of undergraduate students in U.S. comes from low-income households
 - 50% of California students go through food insecurity

Questions we are trying to present

Imagine yourself as a college student in a unfamiliar town where delivery restaurants are limited (You can't eat McDonald's everyday!!!)

- What to eat?
- How to keep balanced nutrition?
- How to answer all the questions above while keeping a reasonable budget?

We aim to highlight the difficulties of college students living on their own for the first time from cooking and food preparation perspective

Cook Your Route

- Text-based selection game developed in Twine
- Players start with different budgets and select different markets
- Each market has a different price and a random event/discounts
- The player chooses different ingredients → game provides different recipes

Main Game Features

Select Budget

Select Ingredients

Cook!

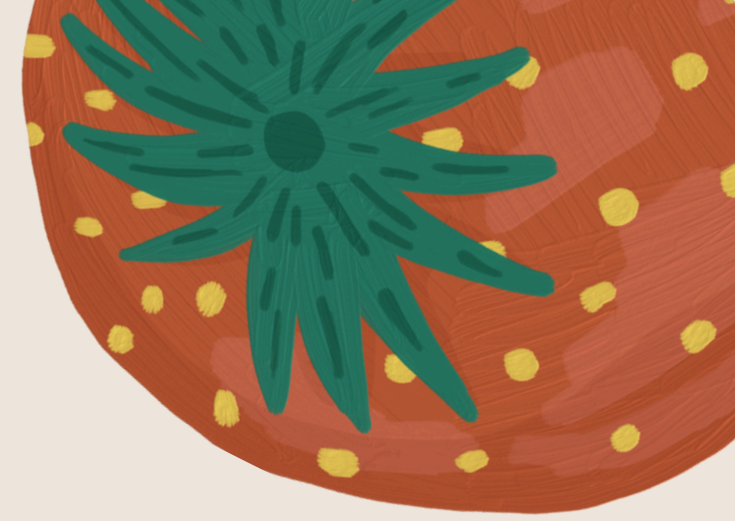

Select Market

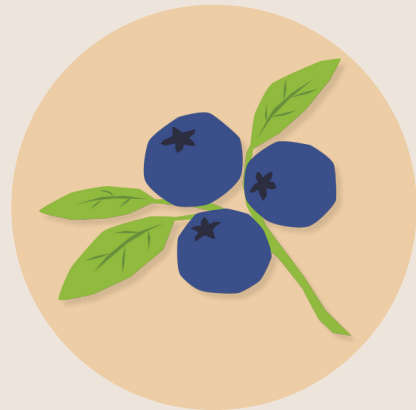

Output Recipe

Rhetoric

Pathos: Different choice of market and food lead to different outcomes: warm and cozy day or starving code night, demonstrating how food choices shape mood, health, and belonging

Procedural Rhetoric: Instead of being told to “eat healthy on a budget,” players feel the trade-offs: thin funds, store quality, and limited options in a new town.

Logos: Creative recipe for food all around the world illustrates students can stretch a balanced budget to explore cross-cultural flavors and build steady, healthy habits.

Outcomes

1. You bought nutritious ingredients and cooked yourself a warm and delicious meal, you survived a whole day of hard work and now the good food comforts your stomach and soul. It's time to relax!

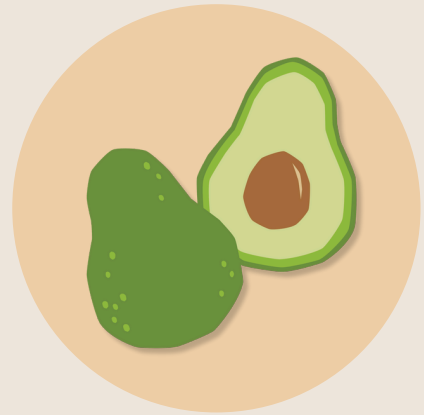

2. You failed to feed yourself, the night grows darker and colder, without the help of food, you are exhausted. But life has to go on, you hop on to bed and hope to eliminate the aching stomach, "tomorrow will be better" you told yourself.

Game Demo!

Fundings Needed: \$500,000

Game Development (50%)

Majority of fundings goes to software engineers that develop more features.

Advertisement (15%)

A good game needs to pair with good advertisement to let more people know

Game Maintenance (15%)

Servers, internet, and game maintenance

Hardware Purchase (20%)

Renting offices, purchasing computers and other office goods
